## SCOR Analyst I

### ***Role:***

Full-time support of SCOR audit, development and improvement initiatives with focus in quantitative and qualitative analysis of SCOR performance using a wide variety of standard approaches.

### ***Responsibilities:***

- Support for development from conception to deployment of business processes improvement initiatives, including program scoping, current-state capture, future-state design, and deployment planning, all within the context of departmental goals and timelines.
- Performance of quantitative and qualitative process analysis within the context of SCOR initiatives, including design, execution, and reporting out of analysis programs.
- Support for development of SCOR methodology including assessment of methodology relevance, utility, and efficiency.
- Support for development of analysis and metrics standards including assessment of standards relevance, utility, and efficiency.
- Preparation of advice and opinion in departmental functions for the overall enhancement of SCOR deployment.

### ***Requirements:***

- Big-5 Consulting experience or similar
- Strong Background in Finance, Science, Economics, Mathematics, or Engineering
- Formal certification in Six-Sigma, TQM, SCOR, or other BPM Methodologies

### ***Minimum Requirements:***

- BS Degree or equivalent 4-year degree with emphasis in engineering
- 2-4 years of experience in process analysis or equivalent in SCOR engagements
