## SCOR Standards - I

### ***Role:***

Full-time development and deployment of enterprise-scale SCOR strategy for Process Standards including nomenclature, metrics, best and lead practices, and appropriate benchmarking and other data suitable for a diverse base of business domains including Supply-Chain, Sales, Marketing, and Design/Merchandising.

### ***Responsibilities:***

- Development of a formal requirements-based enterprise process strategy including needs prioritization, build-borrow-buy strategy for standards sourcing, testing and deployment planning, and change management execution.
- Interfacing with senior management to understand and characterize levels of process standards for SCOR within the enterprise.
- Execution of a formal process standards feedback / refinement program with diverse SCOR practitioner community at enterprise level.
- Planning and execution of formal research program for SCOR process standards and participation in internal or external research programs to enhance value of process standards.
- Preparation of advice and opinion in departmental functions for the overall enhancement of SCOR deployment.

### ***Desired Competencies***

- Big-5 Consulting experience or similar
- Background in Finance, Science, Economics, Mathematics, or Engineering
- Formal certification in team development methods

### ***Minimum Requirements:***

- BS Degree or equivalent 4-year degree with emphasis in engineering
- Formal certification in Six-Sigma, TQM, SCOR, or other BPM Methodologies
- 2-4 years of experience in SCOR engagements
- 1-2 years of management experience
- Strong Verbal / Written Presentation Skills – experience in teaching, sales, or marketing
